Training on Child Development was conducted during 20-24 Aug, 2007 at the State Institute of Rural Development, Bakshi Ka Talab, Lucknow. This course was by the Women and Child Welfare and Nutrition faculty of the Institute.

The total number of participants was 21 the description of which one as follows:

S.No.	Description	No.of Participant
1.	District Training Officer	1
2.	Extension Training Officer	1
3.	Senior Instructor	6
4.	Instructor (Project)	6
5.	Regional Assistant	2
6.	Demonstrator	2
7.	Publicity Assistant	3
	Total	21

Course Objectives

1. To aware and familiarize the participants with the various aspects and the importance of stages of child development.
(Knowledge Based Module).
2. To equip the participants with skills related to the assessment of the status of children and as to how we can assure the overall development of children.
(Skill Based Module).

3. To sensitize the participants regarding the field realities so that they should come out with suitable solutions.

(Attitude Based Module).

Course Contents

The Modules which were covered during this training are as follows:

- National Child Policy and Issues related to child development in India.
- Care of pregnant lady and new born infants.
- Diseases related to children and their prevention and Immunization.
- Gender discrimination in childhood.
- Early childhood care of 0 to 6 yrs of age.
- Role of Nutrition in proper child development.
- HIV/AIDS in children.
- Importance of supplementary nutrition and continued breastfeeding during child development.
- Child trafficking.

- Field visit on Early Childhood care in the community.

Course Material Distributed

1. Training literature prepared for the course titled "**Child Development.**"
2. Handouts of the lectures.
3. "**Badhta Bachapan**" a book given by the ICDS Directorate, Lucknow.
4. Handouts of the transparency.

Course Methodology

Training on above module was imparted through various methods such as Lectures, Group Discussions, Group exercises, Demonstration, Presentations, Field Visits, Film Show, Role Play etc. One day was kept for field visit on testing the behavior of community on children development. A questionnaire was prepared for this purpose and the participants were advised to fill them during their field visit. They were asked to visit in the randomly selected village near to the training centre and meet out to the community. The completed questionnaires were compiled and a brief presentation was done in the classroom. Subject experts from different concerned fields were invited to deliver their lecture and share their experiences with the participants. Puppet shows were also done in the class room and nutritional recipes were also prepared and tasted which were demonstrated by the students accompanying with their faculty from the I.T. College, Lucknow.

Assessment/ Evaluation of Course

The understanding and utility of the training modules was evaluated by participants through an evaluation procedure. Overall evaluation ranking was excellent, which shows better understanding of the subjects covered. Similarly the evaluation of the way of presentation of the speaker was done which again came out to be excellent. This shows that the speakers were successful in conveying their contents to the participants.

The arrangement of boarding, lodging and the classroom facilities were also appreciated by the participants and they demanded to extend the duration of the training.

At last, in closing ceremony, certificates were distributed along with their group photographs to the participants on their successful completion of entire course by the Director General of the Institute.
